

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A module for use in a process tool comprising:
an enclosure for housing a device to be tested; and
a frame coupled to the enclosure, the frame including a ~~standard~~ box open-loaded tool
standard (BOLTS) interface to the process tool and a kinematic interface to the enclosure to
facilitate, repeatable and high accuracy docking of the enclosure.
2. (canceled)
3. (original) The module of claim 1, wherein the process tool comprises an
equipment front end module (EFEM).
4. (currently amended) The module of claim ~~2~~ 1, wherein the kinematic
interface comprises:
a plurality of spherical shaped objects on the frame which engage a plurality of
machined features on the enclosure.
5. (original) The module of claim 4, wherein the machined features
comprises a cone, groove or flat machined features.

6. (original) The module of claim 1, wherein the enclosure includes first an internal air path to keep a substrate located therein substantially clean.

7. (original) The module of claim 6, wherein the enclosure includes:
a second internal air path to cool electronics via the use of fans to draw heat air from the electronics out of the enclosure via ducts.

8. (original) The module of claim 1, wherein the enclosure includes fan modules for removing hot air from the module.

9. (original) The module of claim 8, wherein the enclosure includes an exhaust vent.
